Industrial Fans for Spray Drying Systems

Designing and manufacturing centrifugal fans for spray drying applications place special demands on both production processes and fan design.

With more than 50 years of experience, we know these demands in detail and take pride in supplying the very best fan each time. BarkerBille has supplied hundreds of fans for engineering companies that are market leaders in designing production lines for the food industry.

Advantages of BarkerBille

- easy-to-clean fans
- sanitary construction
- highly energy-efficient operation
- cost-competitive solutions
- instant 3D drawings available
- extensive technical assistance and know-how.

Example of supplied fans for Dairy Industry:

- Supply / pressure fans
- Exhaust / suction fans
- CIP Purge fan
- Cooling fans
- Purge Air fans
- Regeneration fans
- Fluidized Bottom Air Fan
- Filter fans
- VF fans
- SFB fans
- as well as intake and exhaust silencers.
